Our customers

Global simplicity, trusted transparency

IT ASSET MANAGEMENT

Vendor management and procurement services, Logistics and Global Warehousing. EOS teams can manage all IT Hardware from Laptops to accessories, access points, to Vending Machines. EOS provides a full lifecycle solution covering procurement right through imaging/configuration, to asset disposal/reverse logistics.

We have built a holistic program to give visibility and predictability to the entire IT supply chain. Whether it be software or hardware, EOS can simplify your asset lifecycle strategy from the initial purchase through the decommissioning of any given asset.

People First

New Hire Experience extremely important for all at EOS. Significant investment goes into ensuring our teams are set up for success:

- Pre-start date welcome communications
- **EOS Learning:** Our internal learning platform with centralized SOPs + exams. Instantaneous SOP changes can then be cascaded across groups of employees.
- **New Hire SOP** will be compiled for client engagement, to ensure smooth and consistent onboarding experience
- **4-tiered approach to training:** SOP deep dive, Exams, Practical Experience, Sign-off by Lead
- Focus on SOP compliance.
- Structured 2-week inductions
- Sandbox Environment / Knowledge Sharing during Transitions

Process Optimization

EOS approach our services through a lean lens, continually refining processes to strip out waste, improve efficiency, and deliver time and cost savings to our clients.

"I have worked with many partners through my career; this is the most productive and collaborative partnership I have experienced to date. I am guaranteed transparency in all engagements, I see lean operations across the organization and a real drive for operational excellence."
